PETROLEUM JELLY MANUFACTURING PLANT

Your Trusted Partner for Consultancy and Turnkey Project Execution

SALVIN
Engineering - Processing - Packaging

COMPANY OVERVIEW

Salvin Industries is a leading engineering, technology and consulting conglomerate, working closely with diversified industries spanning across food processing, agriculture, plastics, chemicals, metals healthcare, packaging, Dealer, distributer, super stocks, marketing plan, product analysis and other industries and business sectors offering complete turn-key solutions including advanced engineering, Industry 4.0 solutions, digital transformation and expert technical and management consultancy. With 10+ years of experience and global presence in 8+ countries, Salvin Industries is serving from the most demanding to the most distant customers across the globe. We empower them for rewriting their future with our depths of knowledge, unique ideas, technical expertise, creative solutions and enduring results, all at the most optimal costs, right at their doorsteps.

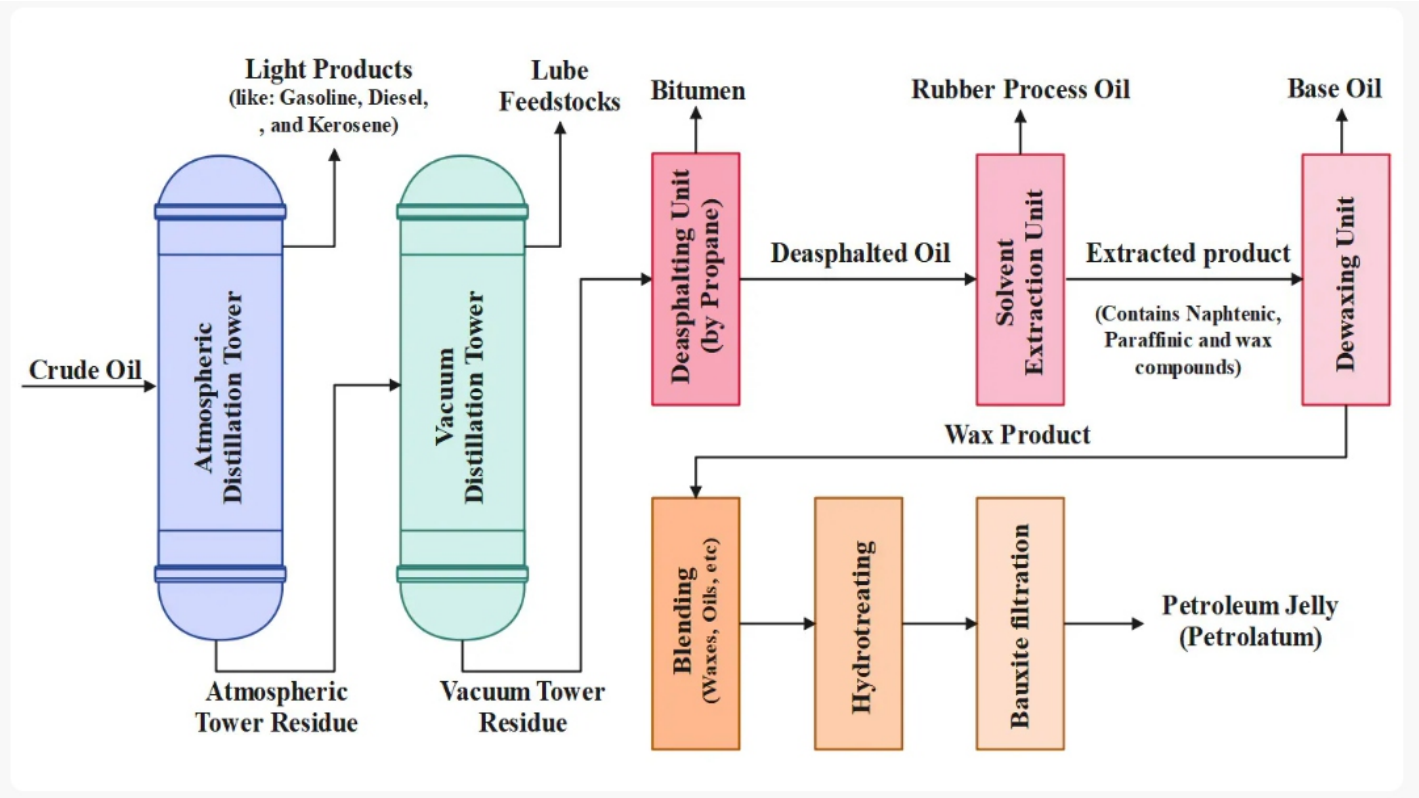
Armed with the eminence in technological expertise, global capabilities and a process driven approach, we have the ability to take on any challenging project. Crossing the geographical borders & cultures and living up to our core values Excellence, Respect, Care & Joy, we propel innovation to engineer solutions that build & foster equality. Working together as one team with all our business partners & associates, we are transforming industries, fueling economies, developing sustainable solutions and thereby elevating societies, globally. We realize the need to respond to the dynamism & speed with which the world is changing all around us and understand the need to anticipate

Petroleum Jelly Manufacturing Plant

Vaseline manufactory and jelly petroleum jelly manufacturing plant and mixer machine to form totally different quite Jelly / Vaseline product such like white mineral jelly, multi-hydrocarbon, mineral jelly, soft paraffin, or Yellow jelly, jelly may be a thick, waxy paste, Jelly, Lubricant , ointment , multi-hydrocarbon , petrolatum , soft paraffin , Vaseline , white petrolatum , petroleum jelly , wax, Aloe vera, astringent, antiperspirant, balm, antiseptic, cold-cream, cream, cleanser, calamine lotion, baby oil, petrolatum base product mixer equipment and plant with filling line base that a lot of peoples use as a skincare product and treatment for minor cuts and burns, jelly the right moisturizer and jelly, usually called the brand-name product Vaseline.

The lighter and agent oil-based product conjure jelly, to boot noted as white mineral jelly or simply as mineral jelly industrial-grade purity.

P&L DIAGRAM PETROLEUM JELLY PROCESSING



Petroleum Jelly Manufacturing Plant

THE PROCESS

PRE-TREATMENT & DE-OILING

The raw slack wax is heated and then subjected to a crystallization and filtration process.

HYDROTREATING OR ACID TREATMENT

The de-oiled wax is mixed with hydrogen and passed over a catalyst at high temperature and pressure. This saturates molecules, removes sulfur, nitrogen, and improves odor/color.

BLENDING & HOMOGENIZATION

The purified wax base is transferred to blending vessels. Precisely calculated amounts of pharmaceutical-grade mineral oils are added. The mixture is heated to a homogenous liquid state.

Petroleum Jelly Manufacturing Plant

THE PROCESS

COOLING & STRUCTURING

The homogenous hot blend is pumped through scraped surface heat exchangers (SSHE). Here, it is rapidly cooled under high shear, forming a smooth, fine crystalline structure critical for the jelly's texture.

DEAERATION

The cooled jelly passes through a vacuum deaerator. For remove trapped air bubbles introduced during blending and cooling.

FILLING & PACKAGING

The jelly is pumped (may be gently reheated for flow) to automatic filling lines.
